to Join Elevator Halves

5mm x .6mm Carbon Strip on Each Wing Ha
Glued on After Ply Braces are Attached

Wing Half
Make a right and left

1/8" Ply Wing Braces Go Here

This wing must be formed before anything is glued to the fuselage. This is done by forming it on the edge of a table or rolling it on a piece of Depron. A lot has been written on how to form Depron on RC
